

OEM Piper – information for the system integrator.

1) PIPOEM mechanical details.

All dimensions in millimetres.

The three fixing holes are 3.2 diameter. Use M3 or M2.5 fixings.

2) PIPOEM power supply requirements.

Piper requires a regulated power supply of +5Vdc $\pm 5\%$, 400ma. Note - there is no onboard regulation, so treat Piper as part of your system logic. The socket is a 5.5mm type, which is designed to mate with a socket having an external diameter of 5.5mm and an internal diameter of 2.5mm. An example is Farnell part number 224 935.
